

MMSI #	QTY	Description	Unit Price	Total Price
338193895	1	MMSI Registration	\$0.00	\$0.00
Item Total				\$0.00

**Your online login name is:** outriggersantacruz2

**Your MMSI number is:** 338193895

**Please Note:**

All radios and other MMSI-requiring equipment (such as AIS units) permanently associated with the vessel should use the same MMSI. The MMSI number will remain with that vessel and its equipment regardless of owner. The registration must be cancelled or updated to reflect a new owner upon sale or trade of the vessel. If you need to test to see if the DSC feature is working, do not test the red button as this will send out an illegal false alarm and cause an unnecessary rescue response! Instead, you may run a test call to the nationwide Coast Guard MMSI number, 003669999. Enter this number into your radio's calling memory and select the "Test Call" option from the radio's list of individual DSC calls, you can then press the "call" or "enter" key. Your radio will silently hail the Coast Guard with a digital signal on channel 70. If everything is working properly, your radio will almost immediately receive the Coast Guard's acknowledgement of your call, providing assurance that both your radio and the Rescue21 system are operating properly. You must be boating in an area served by Rescue21 to use this test.

Once you have programmed this MMSI number into your radio per the instructions in the owner's manual, be sure to note the MMSI number in the manual for future reference.
